Sampling Protocols for CCAMLR-related Activities during IPY

Members are advised that the sampling protocols for CCAMLR-related activities conducted during the International Polar Year (IPY) are now available from a public-access webpage on the CCAMLR website (www.ccamlr.org/pu/e/sc/ipy/a-info.htm). These protocols were developed by the CCAMLR-IPY Steering Committee and cater for a wide range of activities, from dedicated research to opportunistic sampling.

The public-access webpage also includes, for reference, protocols developed for the CCAMLR-2000 synoptic survey of krill in Area 48 and the krill sampling methods described in CCAMLR's *Scientific Observers Manual*.

IPY participants are encouraged to follow these sampling protocols when conducting CCAMLR-related activities.

Dr D.G.M. Miller
Executive Secretary
