**TO ALL MEMBERS OF THE COMMISSION  
AND THE SCIENTIFIC COMMITTEE**

**COMM CIRC 10/130  
SC CIRC 10/75**

17 December 2010

**Notification for Scientific Research in 2010/11 – UK**

In accordance with paragraph 2 of Conservation Measure 24-01, Members are advised that the UK has submitted a notification for research fishing in Subarea 48.3 in order to investigate the stock status of *Dissostichus eleginoides*, *Champsocephalus gunnari*, *Chaenocephalus aceratus* and *Notothernia rossii* (attached). The research fishing is expected to take no more than 10 tonnes of any species in Subarea 48.3 between 15 January and 15 February 2011.

Andrew Wright  
Executive Secretary

Attch.

**NOTIFICATION OF RESEARCH VESSEL ACTIVITY IN ACCORDANCE  
WITH PARAGRAPH 2 OF CONSERVATION MEASURE 24-01**

**Name and registration number of vessel:** FV *Sil* (Registration No. 730450)

**Division and subarea in which research is to be carried out:** 48.3

**Estimated dates of entering and leaving CCAMLR Convention Area:** the vessel plans to enter subarea 48.3 for two weeks between 15 January and 15 February 2011

**Purpose of research:**

- to determine icefish standing stock to produce an assessment of icefish stock size for the derivation of a TAC, and for investigations into icefish population structure and management;
- to determine toothfish pre-recruitment population structure to contribute to the estimates of sustainable yield and assessments of the status of the toothfish stock;
- to determine the standing stock of other major demersal fish species in the area such as *Chaenocephalus aceratus* and *Notothernia rossi*;

**Fishing equipment likely to be used:** bottom trawl

**The survey will not aim to take more than 10 tonnes of any species of fish.**
